Quang Nguyen
Software Engineer
quangnguyen15001@gmail.com
Los Angeles / Orange County Area

I'm Quang Nguyen, a technologist based in the Los Angeles / Orange County area who loves turning ideas into real, impactful products. With experience across frontend and full-stack development at companies like DoorDash and Rivian, I've built everything from consumer web experiences to enterprise platforms using React, TypeScript, Node.js, and cloud technologies. My journey as a self-taught developer taught me to stay curious, adaptable, and hands-on with every challenge. I'm driven by meaningful problems, thoughtful design, and building tools that genuinely improve people's lives. I'm currently open to new opportunities—not just engineering roles, but any work that inspires creativity, innovation, and the future of technology.

Experience

Software Engineer, Frontend - DoorDash
Full-Time, Remote (September 2022 - January 2026)

- Frontend engineer on the DashPass Growth team working on the consumer website.
- **Technologies:** React, Next, Webpack, GraphQL, Typescript, Node.
